RAPID DEPLOYMENT
TEMPORARY LIGHTING KIT

In order to support the timely setup of emergency treatment and recovery areas, we are offering simple, plug-n-play lighting kits.
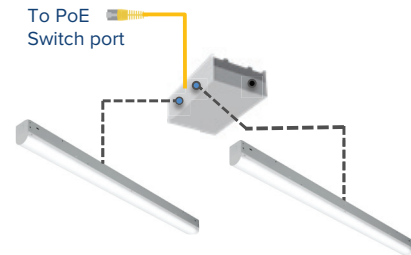

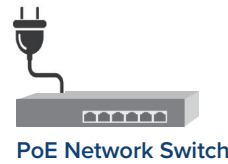

Use cases for these kits include:
- Patient testing tent
- Patient recovery tent
- Portable dormitory
- Portable laboratories
- Anywhere lighting is needed rapidly

Rapid Deployment Temporary Lighting Kits include everything you need to illuminate a space without complex wiring:

- (1) Cisco CDB 8-port UPOE switch.
- (8) or (16) Utility LED light fixtures with quick connect cables
- (2) Wall stations with on/off and dimming capabilities
- (4) or (8) Nodes to power lights and wall stations

One (1) 120v receptacle and minimum Cat5e or better network cables required

PoE Network Switch

To PoE Switch port

Two (2) fixtures per node (without wall station)

Wiring Legend

CAT 5e or higher with RJ45 plugs on ends

2-wire 18AWG with phoenix connectors provided with fixtures

4-wire 18AWG, twisted pair pheonix connector on (1) end and with flying leads on the other end

To PoE Switch port

Wall Station can be connected to any node

Two (2) fixtures per node (with wall station)
